

Company Profile

Company: Tafari Engineering

Established: 21 June, 2020

Registered: 28 December, 2023

Industry: Engineering, Manufacturing, Construction

Motto: Innovating For Life

Director: Brian Osende Mw'Afrika

Location: Kitukutwe, Kira, Wakiso, Uganda

Postal: P.O Box 800410, Ntinda, Kampala, Uganda

Contact: +256-775059713

Email: tafariengineering@gmail.com

Vision

Use engineering knowledge, exploration, and available resources to create environmentally friendly cost effective solutions to housing in Uganda.

Mission

To provide sustainable, affordable, and high-quality construction products and services to the East African region. We specialize in making interlocking bricks and constructing modular houses, designed to solve the rising cost of construction, and growing demand for efficient eco-friendly building solutions.

Products

1. Tafari Interlocking Block (TIB)

The Tafari Interlocking Block (TIB) is a 12x6x6 Inch brick that does not require mortar for construction of walls. To reinforce the wall strength, 40mm steel pipes are used.

2. Tafari Modular House (TMH)

These are houses built using TIBs with a modular concept incorporated. These houses are assembled when constructed and can be disassembled without loss of material.

Services

- Wall Construction
- House Construction
- Modular House Construction
- Off-Grid Solar Systems
